

SCOPE of EAC BUSINESS

Chemical ingredients have usually less utility when they are not got good formulated, but please think for a second, if approximately very well-formulated 650 product alternatives are made of those chemical ingredients by a business producing Industrial Maintenance and General Cleaning Chemicals. Now, here is the time to mention the business itself. Let's start with the story of Emir Agbas Chemistry (EAC) for entrepreneurs and companies that would like to either create a new start-up business or enhance a current business. EAC known as Universal Chemistry earlier was founded in 1994 by Mr. Emir Agbas who operates various businesses globally. Being ready to celebrate its 30th anniversary, EAC has formulated its products to get outcome as the best performance from the minimum quantity of ecological chemicals. Throughout the years of experience, EAC has continuously tried hard to improve its custom-made chemical formulas through its Research and Development Unit to solve its so varied customers' needs. EAC has produced top quality cleaning and maintenance chemicals to meet the demands of private and public companies operating across the world. The improvements in the global chemical industry has been keenly observed by Mr. Emir Agbas, and human's health and the environment's safety issues have been keeping the upmost attention since the EAC and its former succesor Universal Chemistry was founded.

With summarizing the business scope, Mr. Emir Agbas would like to share with interested entrepreneurs and/or companies the main areas of usage custom-made chemical formulas of EAC.
